## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-56, drawn to a method of conducting NMR experiment, classified in class 324, subclass 309.
  - II. Claims 57-93, drawn to a method for assigning a chemical shift, classified in class 436, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group II does not require the following steps: independently modulating NMR cosine and sine signals detected in a direct dimension to generate basic NMR spectra comprising frequency domain signals with  $2^k$  chemical shift multiplet components, thereby enabling phase-sensitive sampling of all jointly sampled  $m$  indirect chemical shift evolution periods; and transforming the basic NMR spectra into phase-sensitively edited basic NMR spectra, wherein the  $2^k$  chemical shift multiplet components of the basic NMR spectra are edited to yield phase-sensitively edited basic NMR spectra having individual chemical shift multiplet components.

Art Unit: 2859

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Alice Choi on May 12, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
